## Specialists in Isotopically Labeled Internal Standards and Metabolites

**IsoSciences, LLC** was founded in 2002 to fulfill the growing need for isotopically labeled internal standards. As the use of LC-MS/MS and GC-MS/MS expanded into clinical diagnostics, IsoSciences began building our catalog product line to complement our custom synthesis segment. IsoSciences quickly became a leading supplier of  $^{13}\text{C}$ ,  $^{15}\text{N}$  and deuterated internal standards to clinical and diagnostic labs and now offers over 1,000 novel catalog products. In addition to our catalog products, IsoSciences provides custom synthesis solutions for challenging organic chemistry problems. IsoSciences is ISO 9001 certified with extensive quality control and analytical capabilities.

As an innovator and manufacturer of stable isotope labeled compounds, IsoSciences has worked with some of the largest pharmaceutical and diagnostic testing laboratories in the world, as well as the CDC, NIH and NIST to design the highest quality internal standards available in the industry. We design our isotopically labeled compounds to be suitable for mass spec quantification. We incorporate  $^{13}\text{C}$  and  $^{15}\text{N}$  to ensure co-elution and stability, both in solution and on the mass spec whenever possible.

IsoSciences continues to expand our  $^{13}\text{C}_3$  steroid and isotopically labeled vitamin product offerings. We have recently launched a toxicology product line, including a line of amphetamines and opioids. These opioids are a synthetic challenge and have  $^{13}\text{C}$  and  $^{15}\text{N}$  located in the backbone of the molecule. All of our toxicology compounds will be offered as DEA exempt solutions. We are pleased to offer these internal standards to the growing market of mass spec analysis.

Whether you are looking for a specific steroid, vitamin panel or custom synthesis, please do not hesitate to reach out to IsoSciences. Our specialty is isotopically labeled internal standards and we are always available to discuss any questions or challenges you may have. IsoSciences appreciates your business and will continue to produce the highest quality isotopically labeled products available.

Thank you,

**Rich Tyburski**  
*President*  
*IsoSciences, LLC*

## Specialists in Stable Isotope & Metabolite Synthesis

### COMPANY OVERVIEW

IsoSciences is an innovator, specializing in the production of isotopically labeled internal standards for mass spec analysis.

We have been fulfilling the market demands for stable isotope labeled reference compounds, advanced intermediates, final drug substances and metabolites for over 15 years.

Customers' needs are met by using advanced processes, stringent quality specifications and specially designed laboratories. We are ISO 9001:2015 certified with extensive quality control and analytical capabilities.

We expanded our catalog offerings to include steroids and vitamins for use in diagnostic testing.

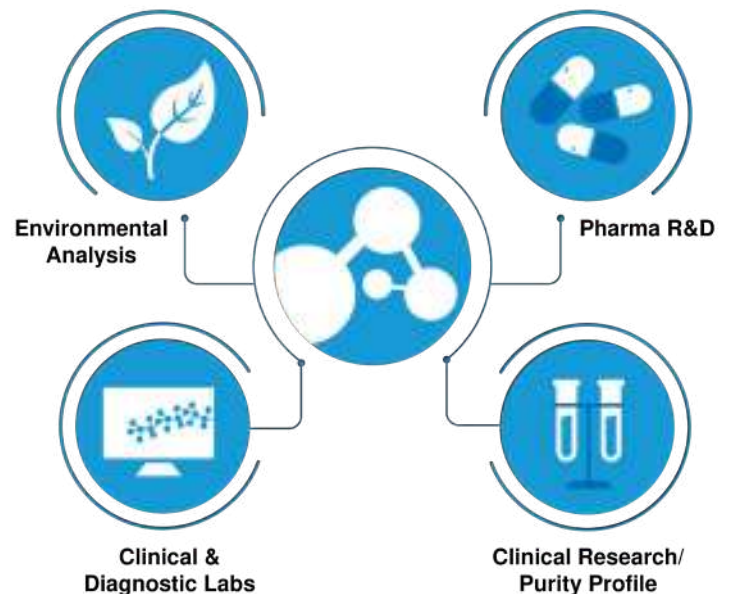

Our team works with diagnostic, nutritional, pharmaceutical and government laboratories around the world to produce the highest quality products available.

### CATALOG PRODUCTS

IsoSciences offers over 1000 catalog products featuring solutions in the categories below:

### MARKET APPLICATIONS

## CUSTOM SYNTHESIS SOLUTIONS

**Custom solutions for complex projects with a fast turnaround time.**

- IsoSciences develops custom synthesized internal standards to satisfy the needs of world leaders in diagnostic testing laboratories, research universities, pharmaceuticals and government agencies including CDC, NIH and NIST.
- The diverse nature of our expertise in  $^2\text{H}$ ,  $^{13}\text{C}$  and  $^{15}\text{N}$  labeling techniques in heterocyclic, steroid, sugar, vitamin, natural product, homo/heterogeneous catalysis and for organosilicon chemistry has allowed IsoSciences to tackle virtually any synthetic project.

## ANALYTICAL CAPABILITIES

### PURITY

Determination by HPLC, ELSD or GC

### STRUCTURAL

Determination by  $^1\text{H}$  and  $^{13}\text{C}$  NMR

### ISOTOPE INCORPORATION

Determination by LC-MS/MS, LC-MS or GC-MS

## QUALITY

**IsoSciences provides the highest quality compounds for isotopically internal standards in the industry. We are ISO 9001: 2015 certified.**

- IsoSciences has synthesized isotopically labeled internal standards for a wide variety of customers and applications.
- Internal standards are important for dependable analytical results. This is particularly true in LC/MS/MS analysis where lower detection limits and faster run times are always the goal.
- We provide pharmaceutical companies with isotopically labeled APIs for use in LC/MS/MS analysis in their pre-clinical, Phase 1 and Phase 2 studies.
- Diagnostic laboratories can now have the ability to use isotopically labeled compounds and not structural analogs as the use of LC/MS continues to expand.

# HOW TO ORDER

## ORDER INFORMATION:

---

### Information to Include with Orders:

- Recipient name
- Telephone
- Email
- Preferred method of payment

### Payment Methods:

Payment is due within 30 days of receipt of invoice.

- Check
- Bank transfer
- Credit card (Visa, Master Card, Amex)

### Large Quantity Discounts:

Compounds listed in the catalog may be ordered in large quantities at a discounted price. Please inquire as to pricing and availability.

### Custom synthesis:

If you do not find what you need in the catalog, please contact us and we can give you a quote on the custom synthesis of the compound that you do require.

### Exact Microbalance Weighing of Material:

Available for an additional fee. This ensures that your entire sample may be used for your critical assays without wasting any material.

### Shipping:

All shipments are made via Federal Express overnight priority. Shipping charges depend upon location but are typically \$25-50 for domestic (USA) shipping.

*IsoSciences provides a detailed Certificate of Analysis with each product purchased.*

# ORDERING CONTROLLED SUBSTANCES

**IsoSciences** is approved by the US Drug Enforcement Agency (DEA) to manufacture an ever-growing number of controlled substance reference standards to suit your analytical, research, and diagnostic needs.

## Exempt Chemical Preparations

We currently offer our Schedule I & II reference standards solely as DEA Exempt Chemical Preparations – this means no DEA Form 222 and/or DEA Registration is required to order.

Additionally, our product line of Schedule III-V compounds are available to order as Exempt Chemical Preparations as well as neat (solid) material. The requirements for ordering the neat material is outlined below.

## Domestic Shipping of Controlled Substances

We require a copy of a current DEA Registration when placing any orders with controlled substances. The registration must be valid and also display that registrant has approval for the controlled substance (Sch. III – V) being ordered. Your DEA license may be scanned/faxed to us at the time of your order. Your order will only be shipped to the address specified on your DEA license.

## Exporting Controlled Substances from the United States

Orders for any DEA Controlled Substance **MUST** provide the following documentation for submission to the DEA for approval to export:

**Import Permit/Letter of No Objection (in English):** If the compound is regulated as a controlled substance in the country of import than an official Import Permit granting permission to import is required from this regulatory authority to apply for export with the DEA. If the compound is not considered controlled in country of import a Letter of No Objection is required from the country's appropriate regulatory authority stating that the substance is not considered controlled and that the authority has no objections to the importation of the compound. For either type of document, the following must be clearly stated:

- Permission for you to import controlled substances.
- Clearly indicates the specific compound you are ordering as well as all amounts.
- The names/addresses of Importee (must match that listed the shipping address on order)
- That it is either a one-time importation or a continuing import permit covering future orders.

**End-Use Certificate (in English):** A letter written on your company letterhead that must state that the compounds being imported will only be for scientific/research use only and that the importee certifies they will not be re-exported out of the country once received.

Once the above documentation has been received, it will then be submitted to the DEA for approval to export. The documentation must be submitted to the DEA at least 15 business days before the tentative date of exportation.

Shipping and handling charges will added to your invoice. Charges are determined based on weight of package and destination. We ship exclusively Federal Express.

# CERTIMASS™ REFERENCE STANDARDS

## New From IsoSciences:

In our continuing effort to provide better stable isotope labeled standards, IsoSciences is proud to announce that we now have our most popular stable isotope labeled standards available as solutions. These CertiMass™ Reference Standards have exact concentration for each lot. They are ready to use and this will lower your cost and reduce waste. In addition, we have packaged our CertiMass™ standards in very affordable package sizes. As always, the solid forms of our standards are readily available.

## Stable Isotope Labeled Standards in Solution

### Why Use CertiMass™ Standards?

- No more preparing your own solutions
- Exact known concentration for each lot
- Ready to use
- No more weighing of samples
- More affordable
- Less waste
- Tailored concentrations

### CertiMass™ Categories:

- Hormones
- Metabolites
- Steroids
- Thyroxine
- Toxins
- Vitamins
- Bile Acids
- Amphetamines
- Toxicology

# PRODUCT CATEGORIES

## Steroids

IsoSciences offers over 300 steroids, including the largest selection of  $^{13}\text{C}$  labeled internal standards available on the market today. Products include **Cortisol- $^{13}\text{C}_3$** , **Aldosterone-d4** and **Testosterone- $^{13}\text{C}_3$** .

## Vitamin D

IsoSciences has demonstrated their expertise in synthesizing Vitamin D metabolites, including **25-Hydroxy, 1,25 and 24, 25-Dihydroxy and 3-EPI Vitamin D**, for over 15 years.

## Vitamin K

Vitamin K deficiency has been linked to numerous disorders. IsoSciences offers various product options for isotopically labeled **K1, MK-4, MK-7, MK-9 and K3**.

## Food & Vitamin

As food testing transitions from immunoassay to LC-MS/MS, IsoSciences is the #1 source for isotopically labeled vitamins including a wide selection of **B vitamins**.

## Catechins

The health benefits of Green Tea are widely reported. IsoSciences has a wide selection of catechin, epicatechin and their gallates derivatives.

## Bile Acids

IsoSciences offers multiple isotopically labeled variations of bile acids to allow easy differentiation of isomers. Deuterated products include primary, secondary, conjugated and sulfated bile acids.

## Fatty Acids

IsoSciences offers numerous fatty acids including **DHA, EPA, Oleic and Arachidonic Acid**.

## Thyroxine

Diagnostics labs around the world have been using IsoSciences  $^{13}\text{C}$  labeled **T2, T3, rev-T3 and T4** for their quantification.

## Clinical Diagnostic

As the use of mass spectrometry in clinical chemistry continues to increase, so does IsoSciences's product list. From biogenic amines to drugs, IsoSciences can be your supplier of internal standards.

## Immunosuppressant

LC-MS/MS detection of these complex molecules has been increasing over the past 10 years. IsoSciences offers many products such as deuterated cyclosporin, rapamycin and taclosporin.

## Synthetic Intermediates

IsoSciences has been expanding their library of isotopically labelled building blocks for over 15 years.

## Environmental

IsoSciences has synthesized numerous internal standards for use in agriculture and pollution detection by LC-MS/MS and GC-MS/MS.

## Caffeine Metabolites

IsoSciences has developed an extensive product line of  $^{13}\text{C}$   $^{15}\text{N}$  labeled substituted uric acids and xanthines.

## Toxicology

New! IsoSciences recently launched its toxicology product line. These compounds are labeled with  $^{13}\text{C}$  and  $^{15}\text{N}$  allowing for the most accurate quantification.

## Newborn Screening

IsoSciences offers exact concentration of ready to use solutions of isotopically labeled **amino acids, carboxylic acids, carnitines, steroids and vitamin D metabolites**.

## E-Cigarettes

E-cigarette usage is on the rise and so is its analysis. IsoSciences offers a wide selection of flavors and fragrances.

# BILE ACIDS

IsoSciences offers multiple isotopically labeled variations of bile acids to allow easy differentiation of isomers. Deuterated products include primary, secondary and conjugated bile acids.

# TOXICOLOGY

IsoSciences launched its toxicology product line. These compounds will be labeled with  $^{13}\text{C}$  and  $^{15}\text{N}$  allowing for the most accurate quantification.

### Amphetamine-[13C6] Hydrochloride (Solution)

CATALOG #: S16012-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Codeine Glucuronide-[13C10, 15N] (Solution)

CATALOG #: S16110-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Codeine-[13C3, 15N]

CATALOG #: S17047

CAS #: -

ISOTOPE: ≥98%

1mL (50ug/mL)

### Codeine-[13C4,15N] (Solution)

CATALOG #: S16108-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Codeine-6β-[13C3, 15N] Glucuronide

CATALOG #: S17048

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Methamphetamine-[13C6] Hydrochloride (Solution)

CATALOG #: S16013-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### (±)-3,4-Methylenedioxyamphetamine-[13C6] Hydrochloride (Solution)

CATALOG #: S16014-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### (±)-3,4-Methylenedioxy-N-ethylamphetamine-[13C6] Hydrochloride (Solution)

CATALOG #: S16015-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Morphine Glucuronide-[13C10, 15N] (Solution)

CATALOG #: S16109-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Morphine-[13C3, 15N]

CATALOG #: S17050

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Morphine-[13C4, 15N] (Solution)

CATALOG #: S16107-0.05

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Morphine-6β-[13C3, 15N] Glucuronide

CATALOG #: S17051

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Naltrexone-[13C3, 15N]

CATALOG #: S18009

CAS #: -

ISOTOPE: ≥98%

PURITY: ≥95%

1mL (50ug/mL)

### Ricinine-[d3]

CATALOG #: 11035

# PRODUCT SHEETS

IsoSciences specializes in the production of isotopically labeled internal standards for mass spec analysis. The product sheets in this section highlight some of our most popular product offerings.

# Specialists in Internal Standards

## About IsoSciences

- **Specialists in the isotopically labeled custom synthesis** of APIs and metabolites offering over 1,000 catalog products.
- IsoSciences as an innovator, specializing in the production of isotopically labeled internal standards for mass spec analysis, has been fulfilling the market demands for stable isotope labeled reference compounds, advanced intermediates, final drug substances and metabolites for **over 15 years**.
- Our team works with diagnostic, nutritional, pharmaceutical and government laboratories around the world to produce the highest quality products available.
- Customers' needs are met by using advanced processes, stringent quality specifications and specially designed laboratories. We are **ISO 9001 certified** with extensive quality control and analytical capabilities.

 **Located outside Philadelphia**

 **4800 sq ft lab facility**

**PROVIDING OVER 1000**

**Catalog products** with various compounds used in many applications such as:

FOOD

VITAMIN

STEROID

HORMONE

DIAGNOSTIC TESTING

## ANALYTICAL CAPABILITIES

### PURITY

Determination by HPLC, ELSD or GC

### STRUCTURAL

Determination by  $^1\text{H}$  and  $^{13}\text{C}$  NMR

### ISOTOPE INCORPORATION

Determination by LC-MS/MS, LC-MS or GC-MS

## Product Categories

### Steroids

IsoSciences offers over 300 steroids, including the largest selection of  $^{13}\text{C}$  labeled internal standards available on the market today. Products include **Cortisol- $^{13}\text{C}_3$** , **Aldosterone-d4** and **Testosterone- $^{13}\text{C}_3$** .

### Vitamin D

IsoSciences has demonstrated their expertise in synthesizing Vitamin D metabolites, including **25-Hydroxy, 1,25 and 24, 25-Dihydroxy and 3-EPI Vitamin D**, for over 15 years.

### Vitamin K

Vitamin K deficiency has been linked to numerous disorders. IsoSciences offers various product options for isotopically labeled **K1, MK-4, MK-7, MK-9 and K3**.

### Food & Vitamin

As food testing transitions from immunoassay to LC-MS/MS, IsoSciences is the #1 source for isotopically labeled vitamins including a wide selection of **B vitamins**.

### Catechins

The health benefits of Green Tea are widely reported. IsoSciences has a wide selection of catechin, epicatechin and their gallates derivatives.

### Bile Acids

IsoSciences offers multiple isotopically labeled variations of bile acids to allow easy differentiation of isomers. Deuterated products include primary, secondary, conjugated and sulfated bile acids.

### Fatty Acids

IsoSciences offers numerous fatty acids including **DHA, EPA, Oleic and Arachidonic Acid**.

### Thyroxine

Diagnostics labs around the world have been using IsoSciences  $^{13}\text{C}$  labeled **T2, T3, rev-T3 and T4** for their quantification.

### Clinical Diagnostic

As the use of mass spectrometry in clinical chemistry continues to increase, so does IsoSciences's product list. From biogenic amines to drugs, IsoSciences can be your supplier of internal standards.

### Immunosuppressant

LC-MS/MS detection of these complex molecules has been increasing over the past 10 years. IsoSciences offers many products such as deuterated cyclosporin, rapamycin and taclosporin.

### Synthetic Intermediates

IsoSciences has been expanding their library of isotopically labelled building blocks for over 15 years.

### Environmental

IsoSciences has synthesized numerous internal standards for use in agriculture and pollution detection by LC-MS/MS and GC-MS/MS.

### Caffeine Metabolites

IsoSciences has developed an extensive product line of  $^{13}\text{C}$   $^{15}\text{N}$  labeled substituted uric acids and xanthines.

### Toxicology

New! IsoSciences recently launched its toxicology product line. These compounds are labeled with  $^{13}\text{C}$  and  $^{15}\text{N}$  allowing for the most accurate quantification.

### Newborn Screening

IsoSciences offers exact concentration of ready to use solutions of isotopically labeled **amino acids, carboxylic acids, carnitines, steroids and vitamin D metabolites**.

### E-Cigarettes

E-cigarette usage is on the rise and so is its analysis. IsoSciences offers a wide selection of flavors and fragrances.

## Industry Applications

- Clinical and diagnostic labs utilizing mass specs for quantification and analysis
- Researching purity and impurity profiles in drugs
- R & D in pharmaceutical industries
- Standards for environmental analysis
- Clinical research

## MARKET TRENDS

The use of LC-MS/MS in both the clinical and food testing labs is expanding and the need for isotopically labeled internal standards is more important than ever.

# COMPETITIVE ADVANTAGES

## 1. INCREASED TESTING ACCURACY:

When shifting to  $^{13}\text{C}$  and  $^{15}\text{N}$  isotopes, customers are assured a superior internal standard that co-elutes with the analyte. The isotopes are placed in non-exchangeable positions and in desired molecular fragments to ensure the internal standard allows for accurate measurements.

## 2. CORRECTS FOR SAMPLE VARIATION:

Why co-elute? An internal standard is used to correct for injection to injection variation. The internal standard is unable to correct for ion suppression and matrix effects without co-elution.

## 3. COMPLETE CERTIFICATE OF ANALYSIS:

A complete Certificate of Analysis is issued with every compound. This includes structural identity by  $^1\text{H-NMR}$  and  $^{13}\text{C-NMR}$ , purity assessment by HPLC-UV, GC-FID or HPLC-ELSD and isotope incorporation by LC-MS or GC-MS.

## 4. HIGH PURITY:

IsoSciences compounds routinely analyze over 98% pure and 98% isotope incorporation with no unlabeled material detected.

## Frequently Asked Questions

### Q Do I need an internal standard?

**A** If the lab is running mass spec for quantification (when obtaining a patient value) internal standards are needed to provide confidence in the result.

### Q What is the difference between $^{13}\text{C}$ , $^{15}\text{N}$ and deuterated internal standards?

**A**  $^{13}\text{C}$  and  $^{15}\text{N}$  labeled internal standards allow for more confidence in the results as they can act as a true internal standard. Deuterated internal standards could perform equally as well; however, additional testing must be performed to ensure co-elution and that no loss of deuterium occurs.

### Q Are these internal standards suitable for LC-MS/MS?

**A** Analogs and deuterated internal standards have been used and methods have been validated; however, the proper tests may not have been performed.  $^{13}\text{C}$  and  $^{15}\text{N}$  labeled internal standards enables the labs to ensure increased accuracy without additional testing (co-elution, ion suppression and loss of deuterium).

### Q Why are these more expensive than my deuterated internal standards?

**A** Lower priced internal standards are easier to synthesize. The unlabeled analyte is dissolved in deuterated solvent with base, stirred overnight and dried. This same simple process that occurs in synthetic lab can also occur in reverse. IsoSciences' internal standards are prepared synthetically for a more stable internal standard.

### Q We are currently using a different internal standard, why switch?

**A** Is the current assay having any performance problems? Does the internal standard co-elute? (If not, then it isn't correcting for ion suppression/matrix effect.). Has the stability of the deuterium on the internal standard been tested? (Likely not)

### Q We already have a method and it is validated.

**A** Implementing a change to an internal standard for most labs requires a re-validation run to ensure the new internal standard properly performs in the assay. Utilizing a superior internal standard can correct for ion suppression / matrix effect allowing the lab to have more accuracy in their test results.

# BILE ACIDS

## IsoSciences Offers a Full Set of Unlabeled and Labeled Bile Acids

The two primary bile acids, cholic acid and chenodeoxycholic acid, are oxidized from cholesterol in the liver. In the intestine, the primary bile acids are then dehydroxylated to the secondary bile acids; cholic acid to deoxycholic acid and chenodeoxycholic acid to lithocholic acid and ursodeoxycholic acid. The two primary and three secondary bile acids can also be converted to their glycine and taurine conjugates to increase water solubility. By choosing Chenodeoxycholic Acid-[<sup>2</sup>H<sub>9</sub>] (mw 401.5), Deoxycholic Acid-[<sup>2</sup>H<sub>6</sub>] (mw 398.5) and Ursodeoxycholic Acid-[<sup>2</sup>H<sub>4</sub>] (mw 396.5) one can differentiate the three bile acids even though the unlabelled standards all share the molecular weight of 392.5. This allows for clear determination and identification of each bile acid, as well as the glycine and taurine conjugates.

### Primary Bile Acids

Catalog #	Compound Name
13098UNL	Cholic Acid
13098	Cholic Acid-[d <sub>4</sub> ]
13101UNL	Chenodeoxycholic Acid
13101	Chenodeoxycholic Acid-[d <sub>4</sub> ]
13103	Chenodeoxycholic Acid-[d <sub>9</sub> ]

### Secondary Bile Acids

Catalog #	Compound Name
13100UNL	Deoxycholic Acid
13100	Deoxycholic Acid-[d <sub>4</sub> ]
13227	Deoxycholic Acid-[d <sub>6</sub> ]
13099UNL	Lithocholic Acid
13099	Lithocholic Acid-[d <sub>4</sub> ]
13102UNL	Ursodeoxycholic Acid
13102	Ursodeoxycholic Acid-[d <sub>4</sub> ]

**Coming Soon: Bile Acid Glucuronides**

Catalog #: 13443

Glycodeoxycholic Acid-[d<sub>4</sub>]

Catalog #: 13226

## Analytical Capabilities

- **PURITY**  
Access by HPLC, ELSD or GC
- **STRUCTURAL**  
Determination by <sup>1</sup>H and <sup>13</sup>C NMR
- **ISOTOPE INCORPORATION**  
Calculated by LC-MS/MS, LC-MS or GC-MS

**IsoSciences** as an innovator, specializing in the production of isotopically labeled internal standards for mass spec analysis, has been fulfilling the market demands for stable isotope labeled reference compounds, advanced intermediates, final drug substances and metabolites for over 15 years.

## Now Available Full Panel of Bile Acid Sulfates

### Primary Bile Acid Sulfates

Catalog #	Compound Name
13098UNL3SO	Cholic Acid-3-Sulfate Sodium Salt
130983SO	Cholic Acid-[d <sub>4</sub> ]-3-Sulfate Sodium Salt
131013SO	Chenodeoxycholic Acid-3-Sulfate Sodium Salt
13101UNL3SO	Chenodeoxycholic Acid-[d <sub>4</sub> ]-3-Sulfate Sodium Salt

### Secondary Bile Acid Sulfates

Catalog #	Compound Name
13100UNL3SO	Deoxycholic Acid-3-Sulfate Sodium Salt
131003SO	Deoxycholic Acid-[d <sub>4</sub> ]-3-Sulfate Sodium Salt
13099UNL3SO	Lithocholic Acid-3-Sulfate Sodium Salt
130993SO	Lithocholic Acid-[d <sub>4</sub> ]-3-Sulfate Sodium Salt
13102UNL3SO	Ursodeoxycholic Acid-3-Sulfate Sodium Salt
131023SO	Ursodeoxycholic Acid-[d <sub>4</sub> ]-3-Sulfate Sodium Salt

## Our Deuterated Internal Standards Contain no M+0

### Competitive Advantages

#### 1. INCREASED TESTING ACCURACY:

When shifting to <sup>13</sup>C and <sup>15</sup>N isotopes, customers are assured a superior internal standard that co-elutes with the analyte. The isotopes are placed in non-exchangeable positions and in desired molecular fragments to ensure the internal standard allows for accurate measurements.

#### 2. CORRECTS FOR SAMPLE VARIATION:

Why co-elute? An internal standard is used to correct for injection to injection variation. The internal standard is unable to correct for ion suppression and matrix effects without co-elution.

#### 3. COMPLETE CERTIFICATE OF ANALYSIS:

A complete Certificate of Analysis is issued with every compound. This includes structural identity by <sup>1</sup>H-NMR and <sup>13</sup>C-NMR, purity assessment by HPLC-UV, GC-FID or HPLC-ELSD and isotope incorporation by LC-MS or GC-MS

#### 4. HIGH PURITY:

IsoSciences compounds routinely analyze over 98% pure and 98% isotope incorporation with no unlabeled material detected.

## Coming Soon: Conjugated Muricholic Acids

### Secondary Bile Acid Sulfate Conjugates

### New Muricholic Acids

Catalog #	Compound Name
18010	β-Muricholic Acid
18011	α-Muricholic Acid
18012	γ-Muricholic Acid
18015	ω-Muricholic Acid
18034	β-Muricholic Acid-[d5]
18035	α-Muricholic Acid-[d5]
18036	γ-Muricholic Acid-[d5]
18037	ω-Muricholic Acid-[d5]

IsoSciences implements advanced quality processes providing our customers the best solution that meets their specs. We are ISO 9001 certified with extensive analytical capabilities.

### Bile Acid Substrates

Catalog #	Compound Name
19013	7α,12α-Dihydroxy-3-oxo-cholest-4-en-26-oic Acid
19014	3α,7α-dihydroxy-5β-cholestan-26-oic Acid
19015	7α-hydroxy-3-oxo-cholest-4-en-26-oic Acid
18123	7α,12α-dihydroxy-5β-cholestan-3-one
18125	7α,12α-dihydroxycholest-4-en-3-one
19016	7α-hydroxy-5β-cholestan-3-one
19017	7α-hydroxycholest-4-en-3-one

# FOOD & VITAMIN TESTING

IsoSciences is a leading supplier for isotopically labeled vitamins including a wide selection of B vitamins and still growing as laboratory food testing transitions from immunoassay to LC-MS/MS.

IsoSciences has grown a global reputation for synthesizing high quality, stable isotope labeled compounds with the most innovative chemical solutions on the market today!

## Vitamin B

Catalog #	Vitamin	Compound
9209	B1	Thiamine- $^{13}\text{C}_4$ Hydrochloride
7072	B2	Riboflavin- $^{13}\text{C}_4, ^{15}\text{N}_2$
18106	B2	Riboflavin- $^{13}\text{C}_5$
14327	B3	Nicotinamide- $^{13}\text{C}_3, ^{15}\text{N}$
14451	B3	Nicotinic Acid- $[\text{d}_4]$
13257	B3	Nicotinic Acid- $^{13}\text{C}_3, ^{15}\text{N}$
14452	B3 (Amide)	Nicotinamide- $[\text{d}_4]$
5065	B5	Calcium Pantothenate- $^{13}\text{C}_6, ^{15}\text{N}_2$
7098	B6	Pyridoxal- $[\text{d}_3]$
7099	B6	Pyridoxamine- $[\text{d}_3]$ Dihydrochloride
14449	B6	Pyridoxine- $[\text{d}_2]$ Hydrochloride
P2007098	B6	Pyridoxine- $[\text{d}_3]$ Hydrochloride
7017	B6 (Phosphate)	Pyridoxal- $[\text{d}_3]$ Phosphate
5023	B7 (H)	Biotin- $[\text{d}_2]$
15046	B7 (H)	Biotin- $[\text{d}_4]$
14139	B9	Folic Acid- $^{13}\text{C}_5$
14144	B9	Folic Acid- $^{13}\text{C}_5, ^{15}\text{N}$
14168	B9 (Active Form)	5-Methyltetrahydrofolic Acid- $^{13}\text{C}_5$
14168Ca	B9 (Active Form)	5-Methyltetrahydrofolic Acid- $^{13}\text{C}_5$ Calcium Salt
S14112	B12	Cyanocobalamin- $^{13}\text{C}_7$

## Vitamin D

Catalog #	Vitamin	Compound
S5014	D2	Ergocalciferol-[d <sub>3</sub> ]
S3077	D3	Cholecalciferol-[d <sub>3</sub> ]
S13036-0.1	D3	Cholecalciferol-[ <sup>13</sup> C <sub>5</sub> ]
S12334-0.1	D3	Cholecalciferol-[ <sup>13</sup> C <sub>3</sub> ]
S15008	D3	Cholecalciferol-[d <sub>6</sub> ]

## Vitamin K

Catalog #	Vitamin	Compound
5072	K1	Phytonadione-[d <sub>7</sub> ]
14329	K1	Phytonadione-[ <sup>13</sup> C <sub>6</sub> ]
14331	K2	Menaquinone-4-[d <sub>7</sub> ]
15277	K2	Menaquinone-4-[ <sup>13</sup> C <sub>6</sub> ]
15103	K2	Menaquinone-7-[d <sub>7</sub> ]
15278	K2	Menaquinone-7-[ <sup>13</sup> C <sub>6</sub> ]
15406	K2	Menaquinone-9-[d <sub>7</sub> ]
15279	K2	Menaquinone-9-[ <sup>13</sup> C <sub>6</sub> ]
7229	K3	Menadione-[d <sub>6</sub> ]

## Other Vitamins

Catalog #	Vitamin	Compound
12232	CoQ10	Coenzyme Q10-[d <sub>6</sub> ]
9036	DHA	cis-Docosahexaenoic Acid-[d <sub>5</sub> ]
10097	E	α-Tocopherol-[d <sub>6</sub> ]
16080	E	α-Tocopherol-[ <sup>13</sup> C <sub>3</sub> ]
16097	E	α-Tocopherol-[ <sup>13</sup> C <sub>6</sub> ]
16098	E	α-Tocopherol-[ <sup>13</sup> C <sub>9</sub> ]
9037	EPA	cis-Eicosapentaenoic Acid-[d <sub>5</sub> ]

### CertiMass™ Reference Standard Solutions

- ISO 9001:2015 certified
- Exact, certified concentration
- Ready to use
- Custom mixes available

### Custom Synthesis

- Stable labeled synthesis
- Fast delivery

### Labeled Flavanols

- Catechin-[<sup>13</sup>C<sub>3</sub>]
- Kaempferol-[<sup>13</sup>C<sub>3</sub>]
- Myricetin-[<sup>13</sup>C<sub>3</sub>]
- Quercetin-[<sup>13</sup>C<sub>3</sub>]

### Catechins

- Catechin-[<sup>13</sup>C<sub>3</sub>]
- Gallicocatechin-[<sup>13</sup>C<sub>3</sub>]
- Epigallocatechin-[<sup>13</sup>C<sub>3</sub>] Gallate
- Epicatechin-[<sup>13</sup>C<sub>3</sub>]

# STERIODS

IsoSciences offers over 300 steroids including the largest selection of  $^{13}\text{C}$  labeled internal standards available on the market today.

All steroids come with complete Certificate of Analysis, including a purity figure, NMR confirmation, mass spec identification and the isotope incorporation.

## Labeled Internal Standards

Catalog #	$^{13}\text{C}$ Labeled Steroids
9044	Androst-4-ene-3,17-dione- $^{13}\text{C}_3$
12998	Boldenone- $^{13}\text{C}_3$
15364	Cholesterol- $^{13}\text{C}_5$
10409	Cholesterol- $^{13}\text{C}_3$
S14465	Cortisol- $^{13}\text{C}_3$
S14466	Cortisone- $^{13}\text{C}_3$
S15407	Cortisone- $^{13}\text{C}_3$ -21-Sulfate
14317	Dehydroepiandrosterone- $^{13}\text{C}_3$
14242	Dehydroepiandrosterone- $^{13}\text{C}_3$ Sulfate Sodium Salt
14467	11-Deoxycorticosterone- $^{13}\text{C}_3$
14464	11-Deoxycortisol- $^{13}\text{C}_3$
6065	Dihydrotestosterone- $^{13}\text{C}_3$
14146	17 $\beta$ -Estradiol- $^{13}\text{C}_3$ Undecanoate
9124	17 $\beta$ -Estradiol- $^{13}\text{C}_3$
10311	Estrone, 3-methyl- $^{13}\text{C}_2, \text{d}_3$ Ether
9125	Estrone- $^{13}\text{C}_3$
15094	Exemestane- $^{13}\text{C}_3$

Catalog #	$^{13}\text{C}$ Labeled Steroids
10157	16 $\alpha$ -Hydroxyestradiol- $^{13}\text{C}_3$
10156	16 $\alpha$ -Hydroxyestrone- $^{13}\text{C}_3$
11187	17 $\alpha$ -Hydroxypregnenolone- $^{13}\text{C}_2, \text{d}_2$
10333	17 $\alpha$ -Hydroxyprogesterone- $^{13}\text{C}_3$
6118	2-Methoxy- $^{13}\text{C}_2, \text{d}_3$ -Estradiol
6117	2-Methoxy- $^{13}\text{C}_2, \text{d}_3$ -Estrone
6114	4-Methoxy- $^{13}\text{C}_2, \text{d}_3$ -Estradiol
6113	4-Methoxy- $^{13}\text{C}_2, \text{d}_3$ -Estrone
14033	Prednisone- $^{13}\text{C}_2, \text{d}_2$
17058	Pregnanediol- $^{13}\text{C}_3$
16216	Pregnanediol- $^{13}\text{C}_3$ Glucuronide
10402	Pregnenolone- $^{13}\text{C}_2, \text{d}_2$
10403	Pregnenolone- $^{13}\text{C}_2, \text{d}_2$ Sulfate Sodium Salt
16178	Progesterone- $^{13}\text{C}_5$
10314	Progesterone- $^{13}\text{C}_3$
6066	Testosterone- $^{13}\text{C}_3$

S14005-1.0	Testosterone-[d <sub>3</sub> ] Heptanoate
S14006-1.0	Testosterone-[d <sub>3</sub> ] Isocaproate
S14007-1.0	Testosterone-[d <sub>3</sub> ] Phenylpropionate
S14008-1.0	Testosterone-[d <sub>3</sub> ] Propionate
S14009-1.0	Testosterone-[d <sub>3</sub> ] Undecanoate
3009	Testosterone-[d <sub>8</sub> ]
S16199-1.0	Testosterone-[d <sub>8</sub> ]
15272	Tetrahydro-11-deoxycortisol-[d <sub>3</sub> ]
12182	3α,5β-Tetrahydroaldosterone-[d <sub>3</sub> ]
14999	Tetrahydrocorticosterone-[d <sub>3</sub> ]
14468	Tetrahydrocortisol-[d <sub>3</sub> ]
14469	Tetrahydrocortisone-[d <sub>3</sub> ]
18005	5α-Dihydroprogesterone-[13C <sub>5</sub> ]
18006	20α-Dihydroprogesterone-[13C <sub>5</sub> ]
18110	Dehydroepiandrosterone-[d <sub>6</sub> ]-3-o-glucuronide
18111	Cortisol-[d <sub>4</sub> ]-21-glucuronide

## ANALYTICAL CAPABILITIES

- **PURITY**  
Access by HPLC, ELSD or GC
- **STRUCTURAL**  
Determination by <sup>1</sup>H and <sup>13</sup>C NMR
- **ISOTOPE INCORPORATION**  
Calculated by LC-MS/MS, LC-MS or GC-MS

### Aldosterone-[d<sub>4</sub>] (Solution)

Catalog #: S11214

### Cortisol-[<sup>13</sup>C<sub>3</sub>] (Solution)

Catalog #: S11214

*IsoSciences has an expert team of talented synthetic chemists that can prepare any novel steroid...even steroids not shown on product list...Contact Us Today!*

## Competitive Advantages

### 1. INCREASED TESTING ACCURACY:

When shifting to  $^{13}\text{C}$  and  $^{15}\text{N}$  isotopes, customers are assured a superior internal standard that co-elutes with the analyte. The isotopes are placed in non-exchangeable positions and in desired molecular fragments to ensure the internal standard allows for accurate measurements.

### 2. CORRECTS FOR SAMPLE VARIATION:

Why co-elute? An internal standard is used to correct for injection to injection variation. The internal standard is unable to correct for ion suppression and matrix effects without co-elution.

### 3. COMPLETE CERTIFICATE OF ANALYSIS:

A complete Certificate of Analysis is issued with every compound. This includes structural identity by  $^1\text{H}$ -NMR and  $^{13}\text{C}$ -NMR, purity assessment by HPLC-UV, GC-FID or HPLC-ELSD and isotope incorporation by LC-MS or GC-MS

### 4. HIGH PURITY:

IsoSciences compounds routinely analyze over 98% pure and 98% isotope incorporation with no unlabeled material detected.

## Frequently Asked Questions

### Q Do I need an internal standard?

**A** If the lab is running mass spec for quantification (when obtaining a patient value) internal standards are needed to provide confidence in the result.

### Q What is the difference between $^{13}\text{C}$ , $^{15}\text{N}$ and deuterated internal standards?

**A**  $^{13}\text{C}$  and  $^{15}\text{N}$  labeled internal standards allow for more confidence in the results as they can act as a true internal standard. Deuterated internal standards could perform equally as well; however, additional testing must be performed to ensure co-elution and that no loss of deuterium occurs.

### Q Are these internal standards suitable for LC-MS/MS?

**A** Analogs and deuterated internal standards have been used and methods have been validated; however, the proper tests may not have been performed.  $^{13}\text{C}$  and  $^{15}\text{N}$  labeled internal standards enables the labs to ensure increased accuracy without additional testing (co-elution, ion suppression and loss of deuterium).

### Q We already have a method and it is validated.

**A** Implementing a change to an internal standard for most labs requires a re-validation run to ensure the new internal standard properly performs in the assay. Utilizing a superior internal standard can correct for ion suppression / matrix effect allowing the lab to have more accuracy in their test results.

# TOXICOLOGY

## IsoSciences: Specialists in Isotopically Labeled Internal Standards

IsoSciences has launched a new product line of labeled internal standards to be used for LC-MS/MS and GC-MS/MS toxicology analysis. As an innovator of  $^{13}\text{C}$  and  $^{15}\text{N}$  labeled vitamins, steroids and metabolites, IsoSciences is excited to use this expertise to supply the toxicology market with improved internal standards.

### $^{13}\text{C}$ and $^{15}\text{N}$ Toxicology Internal Standard Advantages:

- Co-elute with analyte
- Corrects for sample to sample matrix variation
- No loss of deuterium on the instrument or in solution
- Offered in ready to use DEA exempt solutions

### NEW Toxicology Internal Standards Now Available:

Catalog #	Compound Name
S17047	Codeine- $[\text{}^{13}\text{C}_3, \text{}^{15}\text{N}]$
S16108	Codeine- $[\text{}^{13}\text{C}_4, \text{}^{15}\text{N}]$
S17050	Morphine- $[\text{}^{13}\text{C}_3, \text{}^{15}\text{N}]$
S16107	Morphine- $[\text{}^{13}\text{C}_4, \text{}^{15}\text{N}]$
S17048	Codeine Glucuronide- $[\text{}^{13}\text{C}_3, \text{}^{15}\text{N}]$
S16110	Codeine Glucuronide- $[\text{}^{13}\text{C}_{10}, \text{}^{15}\text{N}]$
S17051	Morphine Glucuronide- $[\text{}^{13}\text{C}_3, \text{}^{15}\text{N}]$
S16109	Morphine Glucuronide- $[\text{}^{13}\text{C}_{10}, \text{}^{15}\text{N}]$
S16012	Amphetamine- $[\text{}^{13}\text{C}_6]$
S16013	Methamphetamine- $[\text{}^{13}\text{C}_6]$
S16014	MDA- $[\text{}^{13}\text{C}_6]$
S16015	MDEA- $[\text{}^{13}\text{C}_6]$

**There is NO Detectable M+0 in any of the IsoSciences Internal Standards.**

## IsoSciences, as a leading supplier of high quality internal standards, has DEA approval for manufacturing all Schedule I-V Controlled Substances.

Drugs, substances, and certain chemicals that are used to make drugs are classified into five (5) distinct categories or schedules depending upon the drug's acceptable medical use or dependency potential. Internal standards are important for dependable analytical results. This is particularly true in LC/MS/MS analysis where lower detection limits and faster run times are always the goal. IsoSciences is ISO 9001:2015 certified providing the highest quality compounds in the industry.

# VITAMIN D

**IsoSciences has demonstrated their expertise in synthesizing Vitamin D metabolites for over 15 years.**

IsoSciences' Vitamin D compounds have been used for over a decade by diagnostic labs and universities around the world. Due to the complexity and sensitivity of Vitamin D, these compounds are stringently monitored for purity and stability to ensure that our customers receive high quality material.

Vitamin D and related metabolites are of key interest for a variety of diseases ranging from bone health, intestinal absorption, immune diseases and cancer. Vitamin D can be obtained either through dermal synthesis from sunlight or diet. In the liver it is hydroxylated at the 25 position. Then hydroxylation in the kidney at the 1 position produces 1,25-Dihydroxyvitamin D, the most biologically active form.

## 25-Hydroxyvitamin D Metabolites

# CUSTOM SYNTHESIS

**IsoSciences is a Leading Supplier and ISO 9001 Certified Manufacturer for Isotopically Labeled Internal Standards in the rapidly expanding LC-MS/MS market.**

As specialists in the industry, IsoSciences develops **custom synthesized internal standards** for global leaders in diagnostic testing laboratories, research universities, pharmaceuticals and government agencies including **CDC, NIH** and **NIST**. IsoSciences works closely with our customers to design compounds with strategically placed isotopes that meet their requirements.

## CUSTOM SYNTHESIS

- IsoSciences offers extensive custom synthesis solutions
- Experts in isotopically labeled synthesis
- Analytical testing and detailed Certificate of Analysis are provided for every compound

## CAPABILITIES

- Stable labeled synthesis: Deuterium,  $^{13}\text{C}$ ,  $^{15}\text{N}$
- Synthesis of API, metabolite and intermediates
- Design novel routes to incorporate Deuterium,  $^{13}\text{C}$  and  $^{15}\text{N}$

**We provide our customers a quick and easy process for all custom projects!**

**Contact IsoSciences to Partner on Your Next Custom Synthesis Product!**
